To whom it may concern,

All Ways Electric recently completed the electrical work for our firm on a large multi floor tenant build out project. The work was complex and required close coordination with numerous specialty trades including another electrical contractor working on the shell building.

They handled this in a professional manner and the work was of highest quality. Additionally, All Ways Electric was able to furnish the required manpower and resources to meet a very aggressive schedule.

We look forward to their success and will not hesitate working with them on future undertakings.

If there are any question please contact me.

Sincerely,
Nu Cape Construction

Butch McGovern
General Manager
